ALKYL POLICY

The Management of Alkyl Amines Chemicals Limited is committed towards :

Implementing policies by considering risks and opportunities related to all aspects of our business (especially those related to Quality, Environment, Energy, Occupational Health and Safety) by planning, setting objectives and targets, reviewing periodically, correcting and taking corrective actions, providing resources and continually improving performance and effectiveness of the Management Systems.

Conserving natural resources by optimizing consumption, reducing waste generation, preventing ill health, injury and pollution, providing a safe work place by eliminating hazards and reducing risks, procuring energy efficient products and services through all stages of the product life cycle namely, design, construction, operation, maintenance and delivery.

Making efficient use of available energy at the work place with the purpose of preserving natural resources; reducing green house gas emissions through systematic management of energy and ensuring use of sustainable practices to reduce environmental impacts.

Ensuring awareness; skill and competency of all employees to enable them to consult and participate for better Quality, Environment, Occupational Health, Safety and Energy performance.

Enhancing the security of our employees, facilities, information systems, raw materials and finished products through out the value chain.

Acting ethically in all dealings and fulfilling compliance obligations including legal and other requirements applicable to our business.

Ensuring that the Alkyl Policy is communicated to all employees, made available to interested parties and is reviewed periodically.
